ultravision CLPL
INNOVATION IN PRACTICE

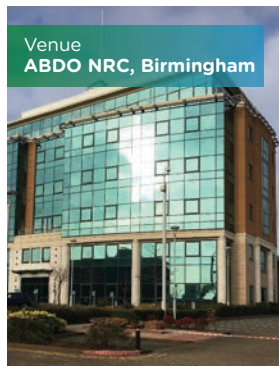

EXHIBITORS: NORTHERN LENSES | POSITIVE IMPACT | VISIONEERING TECHNOLOGIES INC.

'Specialist Club' is an exciting new educational initiative. Whilst not strictly a club it's designed to bring together like-minded practitioners keen to develop their sphere of practice in interesting new directions.

This 2nd Specialist Club is once again focused on contact lenses. We are delighted that Indie Grewal returns as our keynote speaker to share how he's successfully commercialised so-called 'specialist' contact lenses.

Keynote speaker
Indie Grewal

Venue
ABDO NRC, Birmingham

This time the focus is fitting lenses for astigmatism when disposable lenses no longer work or don't have the range. It is a must attend event for anyone specialising in contact lenses or those interested in expanding their scope of fitting beyond just disposable soft lenses.

It's not often that you'll find this quality of interactive education, covering so many useful lens types, under one roof. Not only that but the cost of attendance is dwarfed by the value of the free lenses being offered by the sponsors.

PLACES ARE LIMITED SO EARLY BOOKING IS ADVISED

ATTENDANCE INCLUDES:

- Lunch & refreshments
- Free pairs of lenses worth over £340!
- Free parking

CET points to be confirmed
